

Lighthearted.

by Camille Roskelley

What does it mean to be lighthearted? To me it means to be cheerful, full of love, and enjoying the simple things in life. Some of my favorite people have been lighthearted and full of hope, even in the middle of difficult treatments and challenging times. This collection is a tribute to them. It includes some of my favorite bright and cheery colors, with lots of pink and of course some red and aqua mixed in for good measure. Its happy prints and florals are playful and beautiful, and the basics are the perfect addition to any special project.

I'm am so honored to be a part of the Stitch Pink program this year. Too many women I love and adore have fought a battle with breast cancer over the years and watching them fight has been both inspiring and life changing. My hope with this collection is that we can do a lot of good through raising funds for important services and research as well as encouraging those in the middle of treatment. We love you and we are cheering you on.

- Camille
