Sustainable Sewing

noun:

sewing in a way which leaves a minimal impact on the planet. Whether that is using eco-friendly materials, reusing old textiles, making garments designed to last for a long time or ensuring you use every scrap of fabric reducing fabric wastage.

Moda Scrap Bags . . .

GOOD TO THE LAST SWATCH

What's with these little brown bags?

Surprises! Inside each of these cuties are mixed scraps from the production of Moda's precuts. There could be just a few prints in a bag, or a whole collection's worth!

A print Scrap Bag contains about a ½ pound of fabric (24-32 strips) of varying width (2"-4" +). Some may even have selvage edges. Strip lengths are approximately 36", but that can vary, too.
