How To Measure

We measure most pieces by one of the sides, as illustrated in the drawing on the left. With that measurement, you will know which pieces fit together.

Our Paper

With the growing popularity of our pieces we have started using unbleached, recycled paper as well as bleached, recycled paper. They are both the same weight and quality. The only difference is the color. One is tan because it is unbleached and the other is white because it is bleached. The difference in color does not affect the final outcome of the project at all.
