Stk# AP20082 Pack 1  
Mult 4 Retail \$84.99  
6 28250 47029 1

Why Starch?

- Starching aids in more precise piecing and better cutting accuracy.
- Starched fabrics slip less against each other when you are matching points and butting seams together.
- Using starch helps seams lay flat and stay in the direction you press them.
- Small pieces are less likely to fray or stretch on the bias.
- Starching is an especially good idea when working with flannel or woven fabrics, they won't stretch.
- It restores body and removes any stubborn creases, especially if you have pre-washed.
- The moisture in the starch will shrink your cotton fabric as if you had preshrunk it.
- Add as much starch as you like, it is water soluble so it will wash out.
- If your project has lots of seams, spray starching allows you to easily and effectively finger press.

Tips on how to use starch to prepare your fabric for piecing & quilting

- It's easiest and most efficient to work with just the amount of fabric that you need for a project. It doesn't matter if you've pre-washed or not. (Never pre-wash precuts) It's best to cut your fabric into manageable size pieces, unless it's for lengthwise borders.
- How you apply your starch is a matter of preference and the level of stiffness you want to achieve. Misting, then immediately ironing will smooth your fabric with the lightest level of stiffness. Saturating, then air drying or putting in the dryer will give you a firm, paper like stiffness.
- It is recommended that you spray starch the right side of your fabric and then press on the wrong side, this will allow flakes or marks that might occur to happen on the wrong side of your fabric.
- Fold the fabric in half or thirds with the starch sides together and "mush" or pat the fabric together so the starch will penetrate the fibers.
- When ironing with starch you don't need to use the steam setting on your iron. The starch provides enough moisture to smooth out wrinkles quickly and easily. Adding extra steam will actually increase the ironing time. Use a cotton or wool setting. Do this step gently because you'll be producing steam as you iron and you don't want to distort the fabric.
- Fold your fabric in half or drape it over a hanger if you don't like to make creases at the lengthwise fold line.

Additionally, try starching your backing fabric, it's said that it will glide more easily as you machine quilt it. Also try a light spray coat of starch on finished quilts after each washing. It acts as a protective coating.

Starch Comparison

Starch Name	Weight	Scent	Aerosol	Spray	Size	Price	Notes
Acorn Easy Press	Light	No			16oz, gallon	\$\$\$	Fabric treatment ads body & volume, Great for pre-washed fabric
Best Press	Light	Yes		X	6, 16, 32oz, gallon	\$	Lt weight starch alternative, relaxes wrinkles, no residue, acid free
Flatter	Light	Yes		X	8oz	\$\$\$	Relaxes wrinkles, freshens fabric, leaves fabric static free
Magic Quilt & Craft	Medium	No	X	X	15, 16, 32oz, gallon	\$	Control level of stiffness with single or multiple applications, flake free
Starch Savvy	Medium	No		X	16oz, gallon	\$\$	Control level of stiffness with single or multiple applications, flake free
Terial Magic	Heavy	No		X	16oz	\$\$	Makes fabric paper like. Use as a stabilizer for machine embroidery. Use to run fabric through ink jet printer without freezer paper.

### Terial Magic

Treating fabric with Terial Magic Spray allows fabrics to hold shapes and not fray when cut, sewn or ironed. Single ply fabric is transformed into paper like sheets that are perfect for all sorts of dimensional uses. Long lasting, yet water soluble. Spray, air dry and iron. 16 ounce spray bottle.
